

Pick Me

Wafia

I've always adored ya
But you like me better backed up in the corner
I don't wanna go there
But every time we fight it feels like keeping my head over water
You're talking to me like you got any power
I don't wanna go there

You make ultimatums
Don't you understand
All that's gonna happen
If you go to force my hand?

I pick me
Every day, every night, every single week
I pick me
When you're holding me down I'll get up and leave
I pick me
Who I am and who I'm gonna be
I pick me

I don't need an owner
Can't you just support me the way that you're supposed to?
Every time you push me
I get even colder

You make ultimatums
Don't you understand
All that's gonna happen
If you go to force my hand?

I pick me
Every day, every night, every single week
I pick me
When you're holding me down I'll get up and leave
I pick me
Who I am and who I'm gonna be
I pick me

I pick me

I pick me
Every day, every night, every single week
I pick me
When you're holding me down I'll get up and leave
I pick me
Who I am and who I'm gonna be
I pick me

You make it easy
I'll always pick me
You make it easy
You make it easy
I'll always pick me
You make it easy
