

Grave

Wage War

You're still the person I remember
Make sure they're watching so you're the center
Of attention, I start to wear thin
Your mind's the drug and you skipped the intervention

You will never change
You will never change
You will never change
(You'll take it to your grave)

You will never change
You will never change
You will never change

You're still the person I wanna see less
Your identity as deep as your flesh
You come around like it never happened
I'm the knife, you're the gun fight I'll never win

You will never change
You will never change
You will never change
(You'll take it to your grave)

You will never change
You will never change
You will never change
(You'll take it to your grave)

I've given all you can take
(Never let it go, never, ever let it go)
I've given all you can take
(You'll take it to your grave...)

Burn the pages
But you can't erase it
Burn the pages
But you can't erase it

Burn the pages
But you can't erase it
Burn the pages
But you can't erase it

I've given all you can take
(Never let it go, never, ever let it go)
I've given all you can take
(You'll take it to your grave)

You will never change
You will never change
You will never change
(You'll take it to your grave)

You will never change
You will never change
You will never change

(You'll take it to your grave)

(You'll take it to your grave)

(You'll take it to your grave)
