

Adderall

Walker Hayes

Hey
Let's talk about work, another word for our culture
See a buck, we all turn into vultures
Do more, could you be a little more efficient?
Keep up, and if you can't pay attention
We'll write you a prescription

Yeah, we work Adderall day, and we work Adderall night
Add a little America to that dream like everything's Adderall-
right
But we're just sadder inside, I think the doctors lied
Life's a girl we're supposed to love till she's gone
Looks like we might be looking Adderall wrong

So hard not to jump up on that treadmill
While the neighbor's over there making us look dead still
He's got the best grass and the best house and the best job, bu
t he's stressed out
She's a cool mom in the church choir
That smile just looks so tired

Of working Adderall day, working Adderall night
Add a little America to that dream like everything's Adderall-
right
But we're just sadder inside, I think the doctors lied
Life's a girl we're supposed to love till she's gone
Looks like we might be looking Adderall wrong

Look, I don't want to judge, I got my share of drugs
We'll just keep on popping whatever
It takes to make us seem like we got everything
Adderall together

Yeah, we work Adderall day, and we work Adderall night
Add a little America to that dream like everything's Adderall-
right
But we're just sadder inside, I think the doctors lied
Life's a girl we're supposed to love till she's gone
Looks like we might be looking Adderall wrong
