

Headache

Wallace

I heard that you said
You're in love with me
I liked you in high school
Before you could feel things

Two presidents later
You're changing your mind
Now I don't feel the same
And you're wasting your time

Thanks for the dinner
But I'll catch you later

What happened to just friends
Is it just something you said
To keep me in my place

Cause I heard from Johnny
That you really want me
You're such a headache

Kiss in the back seat
Had to turn you down
I like you but I think
I'll fall asleep on the couch

No silver lining
It's just bad timing

What happened to just friends
Is it just something you said
To keep me in my place

Cause I heard from Johnny
That you really want me
You're such a headache
