

Gimme some sugar baby  
And I'll give you my love  
Won't take your money from you cause you're my drug  
Part of my prescription baby  
Can't get enough  
Can't help my addiction to you  
It's been keeping me up

Feels so high like can't come down  
I'm too old to be fooling around  
I would leave you baby if I could  
But you make me feel so damn good

There will be pain and then numbness will settle in  
[?] novacaine and my relief will then begin

You feeling my addiction baby  
Tell your love right now  
Never thought I should quit you honey but I got to somehow  
Lying on the high you give me  
Over and over and over  
How would I live without you if I was sober

Feels so high like can't come down  
I'm too old to be fooling around  
I would leave you baby if I could  
But you make me feel so damn good
