

## Another Story

Wallows

I can hear my name on your lips  
And I won't forget the last time we kissed  
Though we aren't together I feel your grin  
And I'm not ashamed of what I missed  
I know I use the word "forever"  
I promise I think we'll be better  
If we don't let months turn to years  
But we'll always know what kept us here

We're another story  
Can name my every word you ever told me  
We know that every ending  
Opens a door to a new beginning
