

Canada

Wallows

Wake up in the morning light
Only got you in mind
Wonder if you think of me
Wonder if you'd give me time
Tell me if it's out of line that I'd give you all mine
I know we've only hardly met
Remember every word you said

The way we sat in the heat
The way you wiped off my sweat
The way that you grazed my arm
The way you got in my head
Maybe you should come inside
Maybe we could talk all night
You don't have to mince your words
Anything you say is fine

I can always slow it down
We can take the long way 'round
But I think you have what I need, and maybe I need it now
You don't need to make a sound
You know I can hold it down
Everything you hope to find, I think I've already found
So what are you waiting for?
And will you come back for more?
I want to show you it all
What we could have in store

It's just something about you
All the things that you do
Make me see the end through
Ooh, ooh

Take me back to where you're from
All the way to day one
Everything that led you here
And then we'll keep adding on
So what are we waiting for?
I'm not looking anymore
So let me give you a key to ever unlock my door

It's just something about you
All the things that you do
Make me see the end through
Ooh, ooh, ooh, ooh
