

# It Happens Every Time

Wanda Jackson

Every time I see you with my friend  
It tears me up, time and time again  
Just when I think I got you of my mind  
Oh, you break my heart, it happens every time

Every night I dream of only you  
It's really all I ever seem to do  
I think about the days when you were mine  
Oh, it hurts myself, it happens every time

Every time my friends tell me that soon I will forget  
Or maybe, that day will come, but it hasn't happened yet  
And I'm still here awaiting in that line  
Oh, but you don't care, it happens every time

When I think of I'm finally over you  
Forget about the things we used to do  
Just when it seems I got it all behind  
Oh, I break right down, it happens every time  
Oh, I break right down, it happens every time  
Oh, I break right down, it happens every time
