

# The Void Stares Back

WARGASM

Stare into the void till the void stares back  
The void stares back  
Stare into the void till the void stares back  
The void stares back

You  
I don't know where you're from  
Tell me where you belong  
I don't know where you're from  
Tell me where you go  
When all the lights come on  
Tell me where you belong  
Tell me where you belong

You're out of date  
And you're out of time  
I'm outta this world  
And you're outta your mind

You're out of date  
And you're out of time  
I'm outta this world  
And you're outta your mind

You've outstayed your welcome  
So say goodnight  
With serious momentum  
We overwrite

Oh, the limit  
I've reached the limit like  
  
I'm the child with the telescope eyes  
I can see out over space and time  
And I'm moving at the speed of light  
'Cause I've been waiting till the moment's right to tell you

Oh, did I mention  
I'm from another dimension?  
And, oh, where I come from  
There's no way I'm the only one

Stare into the void till the void stares back  
The void stares back  
Stare into the void till the void stares back  
The void stares back

I've been staring down a black hole  
Going down the same road  
And I don't know, don't know  
How it got so dark  
How we got so cold  
I'd feel safer jumping out a window  
And landing on a street  
All paved with shards and burning cars, it looks like  
Desperate times call for desperate crimes, so

Burn the ark, break the glass  
Embrace the dark and tell me  
How can you keep on screaming when nobody is listening?  
Burn the ark, break the glass  
Embrace the dark  
Everything ends and falls apart

Oh, did I mention  
I'm from another dimension? (Another dimension)  
And, oh, where I come from  
There's no way I'm the only one (No way I'm the only one)

Oh, did I mention  
I'm from another dimension? (Another dimension)  
And, oh, where I come from  
There's no way I'm the only one (No way I'm the only one)

Stare into the void till the void stares back  
Stare into the void till the void stares back

It's always watching  
It always knows  
It's an illusion  
We were never in control

Hell is just a word  
Reality is much worse  
You wanna live forever and ever and ever?  
Get in 'cause we're leaving

Oh, did I mention  
I'm from another dimension? (Another dimension)  
And, oh, where I come from  
There's no way I'm the only one (No way I'm the only one)

I'm from another dimension, dimension  
I'm from another dimension, dimension

(Child with the telescope eyes  
I can see out over space and time  
And I'm moving at the speed of light  
'Cause I've been waiting till the moment's right to tell you)
