

# Odin's Sons

## Warkings

Dragonships that sail the sea  
Spreading words of war and fear  
Fearless warriors at war  
Shieldmaidens that join the horde

From the north, we will rise  
We bring the winter with all his might  
Northern born, break the fear  
Fire and steel, the end is near

Spill their blood  
Sound the horns  
We will crush the shores  
Spill their blood  
Sound the horns  
We are Odins sons  
Odins sons

Born for war, with sword and shield  
Dragons of the open sea

Sound the bells, the north will strike  
No one will get out alive

From the north, like a storm  
We bring the ice and the world will fall

Northern born, break the fear  
Fire and steel, the end is near

Spill their blood  
Sound the horns  
We will crush the shores  
Spill their blood  
Sound the horns  
We are Odins sons
