

# The Watchman

Warlord

Is it the time that fades away, or is it the lonely mind?  
That captures the doubts and takes away  
The strength that we left behind  
Know now...

We will always find our way through the darkness  
As the light devours what we crave  
As the Watchman I will pave the way

Blood runs beyond all borders,  
And seeps into all who pray  
Now we will find the simple spark,  
That brings on the burning day  
Know now...

We will always find our way through the darkness  
As the light devours what we crave  
As the Watchman  
I will pave the way... the way... the way

Keep your eyes fixed on the lights  
Above, and sing till the heavens break  
And then the time will come

We will always find our way through the darkness  
As the light devours what we crave  
We will always find our way through the darkness  
As the Watchman I will pave the way... the way
