

# Go Down Swinging

Warren Haynes

Keep your candle light burning, baby  
So I can see it from the street  
Sparkling on your window sill  
I know we thought that it had faded away a long time ago  
But we used to know it was sho' nuff real

Have you heard the news  
There's a cure for the blues  
Just takes two to change a lovelight baby

I can feel you slipping back into my life  
Somebody told me lightning never strikes twice  
But I can feel it coming 'round again  
Sometimes it's like a gentle wind  
And other times it's like a freight train coming 'round the bend

If you're gonna fall back in love  
Dance naked in the streets  
Give it all you got  
Go down swinging

All the magic and the innocence  
And the dreams of our youth  
Was never wasted on us  
Life didn't have to make any sense  
It was all brand new  
And we were oh, so curious

Notify the nation  
There's a new sensation  
You and I done changed the lovelight baby

I can feel you slipping back into my life  
Somebody told me lightning never strikes twice  
But I can feel it coming 'round again  
Sometimes it's like a gentle wind  
And other times it's like a freight train coming 'round the bend

If you're gonna fall back in love  
Dance naked in the streets  
Give it all you got  
Go down swinging

Our love's been lurking in the dark  
Searching for a spark  
Whoever knew you could change a lovelight baby
