

Bye Bye Sugartown

Warren Hue

Why do I love you, why do you do love me, we both distant from
each other, but you stuck by me
Sugar sugar town, baby come around to my place, we need to work
this out in about like... 10 minutes went to waste
Yeah yeah yeah

I'll be your boyfriend, In your wet dreams tonight
Got no self control, got no self control yeah
Looked inside the page where you left at, looking at the plate
where we last went
Locations, locations, yeah yeah, locations locations

Sugar sugar town yeah yeah, baby come around yeah yeah
All I hear I sounds yeah yeah, coming from your mouth yeah yeah
yeah

I thought we had some fun on a Saturday
Fuck up all my funds then you ran away
Couple thousand doves wouldn't save us
Couple thousands hundreds wouldn't pay us

You don't know bout me, I swear, aye
White dress on your figure looking bright, yeah yeah

Drop down on the side yeah, baby wanna ride yeah
I got no self control, (yeah yeah yeah yeah) I got no self control
I got no self control, (yeah yeah yeah yeah) I got no self control

I got no self control, □ what is your antidote, look at myself
alone
I got nowhere to go, I'm going circles and I've just reflect the
most
I do not Text the most, you call me late, short replies or ghost
I cannot fit in your page, chapter too long I'm afraid to take
up the most, (yeah yeah)

Life is just like a muzzle flash, hit you hard and it go too fast
Rumors spreading like who told you that? fuck the world man though
the best, quotes, so depended on your soul and then
Coldest heart I cannot sew it back, (yeah yeah)

I came to visit, cause you see me like a UFO, (yeah, yeah)

Drop down on the side yeah, baby wanna ride yeah

I got no self control, (yeah yeah yeah yeah) I got no self control
I got no self control, (yeah yeah yeah yeah) I got no self control

Sugartown sugartown, fuck man, this shit too crazy for me I swear to God man like, shit can we go somewhere else
This shit almost feel like a movie or something like
Where even is the sweetness of this location like c'mon dawg
