

Further Decay

Warrior Soul

Well, you never come home
And you are out all night again
Tell me what's gone wrong?
And you're wondering why you're falling down
Trying to even the score
For a light that you lost, you don't care anymore
Flying high above the clouds
You can't see the problems on the ground
Maybe someday you'll come down
You're too too high

Everytime you try to walk away
It's just further decay
Sometimes you try to walk away
It's just further decay
Every time you're on day one
You tell yourself to stop the run
When the second day's begun
You tell yourself...
Every time I watch you walk away

It's just further decay

Everytime I want to walk away

It's just further decay

You didn't come home once again
All night out on the bend
Do you plead some innocence?
And as you're flying above those clouds
The poor people and the clouds
You'll never take me down, I'm too high

Sometimes you have to walk away
For the situation to change

Come on and do a shot with me
It's just further decay
Sometimes you got to walk away
Before there's just further decay
Come on and do a shot with me
It's just further decay
