

light

wave to earth

You always wanted to see the moonlight
And I, I just wanted to see your smile

There is a light not far away from us
From us
The light will shine with the clouds

We're gonna fly up into the blue sky
So slowly
And we held the moon in our arms
You always had me
You're always shining

I've seen a wonderful sight
With a bright glow
You are my sea, you are my sunshine
The star, the moon

There is a light not far away from us
From us
The light will shine with the clouds

We're gonna fly up into the blue sky
So slowly
And we held the moon in our arms
You always had me
You're always shining
