wave

wave to earth

If we go far away out of this land
I want to spend this all night with you
There are waves in your eyes
I'm getting into you
Into you

When you spoke to me
The words are like a flowing star
Now I'm next to you
The waves will take us far away

Oh we will wither someday
It has no scent, it has no warmth
Oh we'll be forgotten someday
But with that wave, it will be
Remembered forever

When you spoke to me
The words are like a flowing star
Now I'm next to you
The waves will take us far away
