Think It Over

Wave

You say you wanna see the city lights
Cause they shine so bright and they're calling you oh
Before you go you need to know
I won't stand in your way but I want you to stay

I remember those summer nights
When I held you tight
And it felt so right
I thought what we had would never end
And now you're leavin'

Baby think it over
Think it over before you walk away
Baby think it over
Think it over before you turn the page
I want you to stay

You say you're goin' to be a star
But to me you are and I never would as you to change
I really want you to chase your dreams
But the pain it leaves is just so hard on me

I remember those summer nights
When I held you tight
And it felt so right
I thought what we had would never end
And now you're leavin'

Baby think it over
Think it over before you walk away
Baby think it over
Think it over before you turn the page
I want you to stay

Stay till the morning comes
I wanna change your mind
One last chance for you to see
What you're leaving behind

I remember those summer nights
When I held you tight
And it felt so right
I thought what we had would never end
But now you're leavin'

Baby think it over
Think it over before you walk away
Baby think it over
Think it over I'm begging you to stay

Baby think it over think it over
Think it over
Baby think it over think it over
