

Under

Wavves

Come inside
I'll be whatever you want me to be I'm perfect
The sun will hide
In the shade of day and night it starts to look

You take me under
It's built and I can't take it
You take me under
It bends and then you break it
It bends and then you break it

Come outside
And let the rain wash over earth and all who serve it
The sun can't hide
With the shame of day and night it starts to look

You take me under
It's built and I can't take it
You take me under
It bends and then you break it
It bends and then you break it

Close your eyes
I'll be whatever you want me to be I'm perfect
Close your eyes
I'll be whatever you want me to be

Under
It's built and I can't take it
You take me under
It bends and then you break it
It bends and then you break it
It bends and then you break it
