

Real Good Day

Wax

I love it when you smile at the start of the day
Laughin' like a child cause you're gettin' your way
Always feelin' blessed never stressed or stray
Yeah I'm gonna love you til my hair turns grey

A picture perfect pairing like the moon and the sun
Excited for the future and what's to come
Never gonna give up on having fun
Splittin' up the bad vibes one by one

You keep me strong when right goes wrong
It's still a real good day
A real good day
A real good day

Sittin' on the beach on the edge of the fray
Hittin' triple dekes like Gordon Bombay
Got me feelin' healthy like a tofu steak
Playin' to your crowd like on Broadway

Blurrin' out the lines that are gettin' in the way
Fishin' for the future that is here to stay
Livin' in the dream that was made to play
Yeah, we got the workings of a real good day

You keep me strong when right goes wrong
It's still a real good day
A real good day
A real good day

It's still a real good

Yeah, feelin' lovely right now
Hey

Ooh, you make me feel like I have it all
We stumbled into something real everything is
Fallin' into place since you came my way
It's as if I ain't never gonna have another bad day

Trust me I've had 'em
Life can get crazy at times
And the weight of the world can weigh on my mind
You always find a way to build up my strength and pride
You take me out of a slump you straighten my spine

And I'll return the favor til the day that I die
I see the future with the two of us creatin' new lives
I see days after days that get greater with time
I look into your eyes and I see the proof of the divine

But it's really quite simple
I'm just sayin' that I love livin' life with you

Spittin' out the bad vibes
Spittin' out the bad vibes

You keep me strong when right goes wrong
It's still a real good day
A real good day
A real good day

It's still a real good
