

# When I Am Gone

Wax

Ain't no tellin' when your time is up  
So everybody with me, lift your cup  
For tomorrow we may all be dead  
That's what a dead wise man said  
The moment right before the lightning struck

Drink one for the ones who drank too much  
Smoke one for the ones who smoked before us  
Pour some liquor out for those who passed on  
And roll one up for me when I am gone

Before mankind could even pitch a tent  
He discovered how the alcohol ferments  
And for the next ten thousand years  
He drank his liquors, wines, and beers  
Let's honor him for all the time he spent  
When tribal cavemen wanted to get high  
There wasn't a dispensary nearby  
Before he found that OG kush  
He smoked every shrub, tree, and bush  
Let's not forget his sacrifice as I

Drink one for the ones who drank too much  
Smoke one for the ones who smoked before us  
Pour some liquor out for those who passed on  
And roll one up for me when I am gone

Every day I'm drivin' in my car  
Let's knock on wood, I hope I make it far  
I'm not just knockin' for myself  
I'm also knockin' for the health  
Of the dude who drives my Lyft home from the bar  
They say they makin' new technology  
That'll make us all live for eternity  
Well, if that stuff really exists  
Please put me on the waiting list  
If I still die, then roll one up for me

Drink one for the ones who drank too much  
Smoke one for the ones who smoked before us  
Pour some liquor out for those who passed on  
And roll one up for me when I am gone  
Drink one for the ones who drank too much  
Smoke one for the ones who smoked before us  
Pour some liquor out for those who passed on  
And roll one up for me when I am gone  
Roll one up for me when I am gone  
Roll one up for me when I am gone

That airplane going by is metaphorical
