

Everything About You

Waylon

Tell me what they said to you
Lemme weed out the lies
How they made you feel like you was nothing
Lemme try to make it right

I wanna give you all of me
Lose myself, find the way
You're still a mystery

I, I wanna know
Everything about you
I, I wanna know
All the little things about you

I've been where you are
Out in the cold, used up
Sleeping in my car
Ooh, you've come so far
Nowhere to go, afraid to show
How beautiful you are

Just take a chance on me
I'll show you things
That you ain't never seen

I, I wanna know
Everything about you
I, I wanna know
Where you go when you get lost in your thoughts
What moves you, what dreams have you got in your heart?
What hurts, make you hide all alone in the dark
I, I wanna know
All the little things about you

And on, and on, the world keeps spinning
I don't care if you're not in it
It's just another day that fades away
So I'll follow you through hell and high water
Chase ya down like there's no tomorrow
Let nothing in my way

I, I wanna know
Everything about you
I, I wanna know
Where you go when you get lost in your thoughts
What moves you, what dreams have you got in your heart?
What hurts, make you hide all alone in the dark
I, I wanna know
All the little things about you

I wanna know
All the little things about you
All the little things about you
