

# Get It Together

Wayne Static

Get It Together

Here we lie  
The beginning  
This eternal  
Save us all  
Try to put it back together  
Timing's right to evoke a secret seance  
Time to fight this undying hunger  
There's no lying  
Deepest darkest  
I'm accepting we've been using  
This could still become a sticky situation  
Got to deal with these urges no

Get it together  
Yeah  
Get it together

End of night  
The beginning

This infernal  
Trade it all  
Do it over so forgetful  
See the light  
It all happens for a reason  
Time to kill this unending season  
There's no lying  
Deepest darkest  
I'm accepting it's the hardest  
Take my body  
Take away the hesitation  
Take away the sensation

Thinking about the days when we went insane  
Snorted ten pills  
Started hallucinating  
Popped some Viagra to make my hair stand up  
The Patron kicks in and it melts my brain  
And then there was the time that we were inside out  
Ate enough E to turn my hair into frosting  
5 am in the parking lot  
Couldn't help ourselves  
We just couldn't stop it  
No remorse, no regrets  
I'd do it all again if I had the chance  
End of night, see the light  
Rode the horse and I aced the test  
Time to fight it off  
Time to come together  
Time to turn it up

Make the case  
Kill the moth  
Self revealed  
Take the loss

Can't replace  
Just because  
What we feel is chaos  
Use this trust to get it together
