

Another Side

We Are KING

Minutes grow to hours
Days become whole years
When the last time, you always smiled when you were here
This city leaves you love long
And you don't know how to deal
Looking for something you can feel
Smoking misillusions
They're disappearing acts reveal
Done with this scene, you need something real

A little more is all we long for
An open door to show us there's another side
And so whilst waiting in hopes we give it a go
There's got to be another side

You turn every corner
Searching for somewhere you ain't been
You've walked every mile of this town you live in
Not looking for fame or fortune
But has its sense of appeal
All you're asking for is something real

More is all we long for
An open door to show us there's another side
And so whilst waiting in hopes we give it a go
There's got to be another side

Seems why it's changing
Everything just stays the same
You watch the time pass by
And it's driving you insane
Darling, darling
You know you've got the right idea
To cross the city lines
To get to something real

My love, please give it a try
You'll find paradise
Right there on the other side
And so you'll see the sunlight
Through the skyline
Showing you another side

Something more is all we long for
An open door to show us there's another side

Another side
Another side
