

No Wait at Five Leaves, Under the Sea

We Are Scientists

You sawed it off and called my bluff
You said, it's true, but not enough
Belief involves a change of scene
It all comes true, eventually
Though patience is key

But, how can this wait?
It's not enough for us
How can this wait?
It's not enough for us
We'll all believe, eventually
But how can this wait?
It's not enough for us

You sent this through, forget-me-nots
Impressive truths, electric shocks
If we can wait for ways to see
Through all the proofs and chemistry
Then, patience is key

But, how can this wait?
It's not enough for us
How can this wait?
It's not enough for us
We'll all believe, eventually
But how can this wait?
It's not enough for us

I can go and overthink this, if you want to
Nothing much is going to change, if it's not forced through
I can go and overthink this, if you want to
And probably will

But, how can this wait?
It's not enough for us
How can this wait?
It's not enough for us
We'll all believe, eventually
But how can this wait?
It's not enough for us
