### We Are Scientists

Now everything is operational so I begin with the residual  
What seems like the hundred thousandth time  
It seems that somewhere down the line something important's gone awry  
and I can't right this wrong

It doesn't matter what we tell ourselves  
We know that formulas and measurements don't always measure up the truth  
It's that these empirical solutions aren't nearly quite as foolproof  
as we'd like to think

So I'll say:  
Settle down

Settle down  
We can't let panic grip us  
If we let panic grip us, everything is lost and I'll say:  
Settle down

Settle down  
We can't get caught up in this  
If we get caught up in this, everything is lost, oh yeah
