

## Slow Death

We Are Scientists

Keep your eye on the time  
The clock is ticking  
And you know better than I  
What I've been missing

If what we're dying is a slow death  
I think we might not even know it  
It's way too viable to forget  
So let's remember it

It's not too late to correct  
Mistakes we're making  
And hope that we can protect  
What may be failing

If what we're dying is a slow death  
I think we might not even know it  
It's way too viable to forget  
So let's remember it

Now I've had your love  
So I can survive  
If my sun goes down  
In your eyes  
Once is not enough  
So say you'll try  
Don't let my sun go down  
In your eyes

If what we're dying is a slow death  
I think we might not even know it  
It's way too viable to forget  
So let's remember it
