

# Something About You

We Are Scientists

Can someone tell me what the problem is?  
This sinking ship is going under  
I know you like it when it's dangerous  
But why I'm in, I can only wonder

There's something about you (5x)

You get your hands on everything you want  
So what's the rush, you know it's coming  
It might be hard to put your finger on  
But once we've touched, it's all or nothing

There's something about you (5x)

Any ending is all right  
Just don't go spending your whole life  
Looking over your shoulder, over your shoulder, over your shoulder

I guess there's nothing to complain about  
You never fell, I know I'm lucky  
You said I'd get it if I wait it out  
Eventually, there's always something

There's something about you (7x)
