There's Nothing Wrong

We Are the Ocean

Brain freeze
and my mind's not thinking straight
Einstein and Freud could not equate
What's going on in my head today
Tongue tied
too late and the moment's gone
Screaming inside
Atomic bomb
Sometimes I wish I could change my DNA
There's nothing wrong with the way we're put together
I'm just trying to get along
And keep on keeping on
Through stormy weather there's room under my umberella
Let's try and get along
And keep on keeping on
Number crunch, add it up mathematically
Rubik cube, hey dude
just let it be
Don't let it get you down, my friend
Backflip, into the swimming pool
Relax, rewind, don't try to be cool
Sometimes it's good to play the fool
People say I'm crazy
But everything looks fine to me because
There's nothing wrong with the way we're put together
I'm just trying to get along
And keep on keeping on
Through stormy weather there's room under my umberella
Let's try and get along
And keep on keeping on
It's gonna take some time
To make these wrongs to right
I don't care where you're from
Oh, why can't we just get along
It shouldn't be like this
I've had enough of politics
All this ignorance I see will be the death of me
So when our hearts start to ache
Got to battle through and break the chains
Why won't they let us be
When all we want is to be free
I had a feeling it had gone too far
Then I remembered
There's nothing wrong with the way we're put together
I'm just trying to get along
And keep on keeping on
And through stormy weather there's room under my umberella
Let's just try and get along
There's nothing wrong with the way we're put together
I'm just trying to get along
And keep on keeping on
And through stormy weather there's room under my umberella
Let's just try and get along
And keep on keeping on
With the way we're put together
And through stormy weather there's room under my umberella
Let's just try and get along

And keep on keeping on
