

Last Prayer

We Shot the Moon

I've pulled down every window
And locked every door
I made sure no trace of life
Gets through the cracks anymore
My breathing is slow and
And where I'm going
I feel every day
But I've never been before
I feel every day
But I've never been before

So won't you please
Treat me the same
Pretend I don't ache
So won't you please
Stay a little longer
I still fear sleep
So I don't close my eyes
There'll be no bright light
So I fight
To stay awake
One more night

Why does desperation call between
Midnight and morning
The bed is getting cold in here
My hopes are growing lonely
My heart is failing
These lungs are collapsing
Let this be my end
Or is there one last chance again
Let this be my end
Or is there one last chance again

So won't you please
Treat me the same
Pretend I don't ache
So won't you please
Stay a little longer
I still fear sleep
So I don't close my eyes
There'll be no bright light
So I fight
To stay awake
One more night

Give me something for the pain
Don't know where to start
I'm so far changed
Could have been beautiful and free

So won't you please
Treat me the same
Pretend I don't ache
So won't you please
Stay a little longer
Won't you please

Won't you please
Won't you please
Repair me now
Repair me now
Repair me now
Repair me now
Repair me now
