

So Long

We Shot the Moon

I see your disguise
A shark with no teeth
Swimming for me
I'm a target in sight
Don't pick this fight with me

You, calling me out
Losing your voice
For the moment of truth
You had a choice
You left white noise

So long, so long
The give and take
What's done is done
My sins unpaid
You left me on a one-way train
And then you turned the other way

You, washing your hands
Clean of the past
A typical move
We weren't built to last

You, tearing me up
From the inside and out
History between
That we don't talk about
Is safe and sound

So long, so long
The give and take
What's done is done
My sins unpaid
You left me on a one-way train
And then you turned the other way

So long, so long forevermore
(So long, so long forevermore)
Eyes up to the ceiling
Your words aren't worth the reading
You got out with a gold handshake

So long, so long
The give and take
What's done is done
My sins unpaid
You left me on a one-way train
And then you turned the other way

My heart, my heart
Goes up in flames
My soul, my soul
You left unclaimed
You drew your sword and sealed our fate
Then you shifted all the blame

More than just a rainy day
So long doesn't erase the pain
