

Everything Else Can Wait

We the Kings

Can you stay with me in this moment
And forget what tomorrow is
You know the only thing that matters
Is right here in your hands
Your thoughts are racing overtaking you
But slow your mind instead

You say how can that be so easy
And I said

When I'm with you
Everything else can wait
Here in your arms
All of it melts away
I don't even care at all what trouble comes our way
As long as I am with you
Everything else can wait

Can you stay with me in this moment
This dream doesn't have to end
You know I'll help you through the motions
To get the past out of your head
I know you got some things you're holding
But don't let them do you in

You say how can that be so easy
And I said

When I'm with you
Everything else can wait
Here in your arms
All of it melts away
I don't even care at all what trouble comes our way
As long as I am with you
Everything else can wait

When I'm with you
Everything else can wait
Here in your arms
All of it melts away
I don't even care at all what trouble comes our way
As long as I am with you
Everything else can wait
Everything else can wait
Everything else can wait
