

Fall for You

We Three

No don't you
Think that you're helpless
Or think that you're hopeless
Or that I don't need you

No baby you
You should never doubt the way you are
Or never love me from afar
Like you feel you need to

I know that I come on too strong
Baby, when I think you're wrong
Even when I know you're right
I still want to fight

So I'm gonna love you
Like I've never loved anyone before
'Cause I know that you could get so much more
And leave me behind

So I'm gonna love you
And pray that I always wake up to see
See your body laying next to me
Wearing one of my tees

Why'd you to go make me fall, fall so hard for you

You're feeling strange
And chocolate won't fix this
You said it's my kisses
That will take this away

And you're feeling shame
Baby, just when you start to shine
You feel that you've crossed some sort of line
But baby, you don't need to

I know that I come on too strong
Baby, when I think you're wrong
Even when I know you're right
I still want to fight

So I'm gonna love you
Like I've never loved anyone before
'Cause I know that you could get so much more
And leave me behind

So I'm gonna love you
And pray that I always wake up to see
See your body laying next to me
Under the sheets
Why'd you to go make me fall, fall so hard
Why'd you to go make me fall, fall so hard
Why'd you to go make me fall, fall so hard for you

For you
For you

For you
For you
Baby, for you
For you
Baby, for you
For you
