

Hold me, baby

We Three

Hold me, baby, just one more time
You make it easy, you make it right

Girl, you and I
I think we're waisted on these butterflies

We're derived
From a lie
Think it's time we come clean

You and I
Can't deny
That we've been stuck with cold feet

Not gonna lie
I kinda like it
Just tell me where to be

Hold me, baby, just one more time
You make it easy, you make it right

Girl, you and I
I think we're waisted on these butterflies

You and I
It's a sign
Staring at the ceiling

Maybe I'm
Out of line
To wanna get quote sleeping

Do you mind
Leavin' the lights,
Cause I really like to see you

Hold me, baby, just one more time
You make it easy, you make it right

Girl, you and I
I think we're wasted on these butterflies

I feel your body when it's no where near me
Still feel you touch me with all that electricity
I feel your body
Still feel you touch me with all that electricity

Hold me, baby, just one more time
You make it easy, you make it right

Girl, you and I

And I think we're wasted on these butterflies
