

Things You Already Know

Ween

Grab that pail
And I'll sail you round the world in my yacht
Oh, I've got it girl
I can promise you the moon and stars
If you'll just give me your heart
See them, over there
Just back beyond the changing room
Yeah, those two
Think they've got it made like I do?
Oh, they're just jealous of you

And don't bother to question
The things you already know
Like I love you so

Sun down
And the natives got their fists up in the air
Oh, they're everywhere
I'll show you how to defuse a mob
If you'll just give me your heart
What's that?
You say you've had some feelings hid away?
I can't handle this today
I may be the man, you are not
So just give me your heart

And don't bother to question
The things you already know
Like I love you so

Screw you, if you want to be with that dude in that grass skirt
Oh, my feelings won't be hurt
Roasting pig beneath the dirt
Guess I won't have your heart
Could've promised you the moon and stars
If you'd just given me your heart
