

HAUNTED HOUSE

WesGhost

Look up at the stars, what do you see?
When you're staring at the galaxy
Are you terrified just like me?
It's hard not to feel small
Somewhere in the clouds
There's raindrops that are too scared to fall down
It feels like this world is a haunted house
And I can't find my way out

You ever walk through a haunted house
And got that feeling like you can't get out?
(I can't be the only one)
You ever walk through a haunted house
And got that feeling like you can't get out?
(I can't be the only one)
Someone let me out, someone let me out
Someone let me out, someone let me out
It feels like this world is a haunted house
And I can't find my way out

Used to making excuses why I felt alone
I've been trying to change the world on my own
After all, my body's just skin and bones
They'll put a ghost on my headstone
18 in a faux home
Take me back to where I belong
I been looking back at my parents trunk
Figure out where it all went wrong

Look up at the stars, what do you see?
When you're staring at the galaxy
Are you terrified just like me?
It's hard not to feel small
Somewhere in the clouds
There's raindrops that are too scared to fall down
It feels like this world is a haunted house
And I can't find my way out

You ever walk through a haunted house
And got that feeling like you can't get out?
(I can't be the only one)
You ever walk through a haunted house
And got that feeling like you can't get out?
(I can't be the only one)
Someone let me out, someone let me out
Someone let me out, someone let me out
You ever walk through a haunted house
And got that feeling like you can't get out?
