She said "How do you want me?"
I'll give you control
I'll let you haunt me
Wherever I go

Heart on your sleeve
Hands on my soul
How do you want me?
I'll give you control

Just another lonely night in paradise
I wanna die but I'm still alive
Wish I could take your pain and make it mine
Let me take the pain, let me take the pain away

You're intoxicating
I'm coming down, I'm coming down
I'm suffocating
When you're around, when you're around

My hands are shaking
I need you now, I need you now
You're intoxicating
I'm coming down, I'm coming down

I've been going through withdrawals from you
I've been going through withdrawals from you
I've been going through withdrawals from you
I've been going through, I've been going through

I've been going through withdrawals from you
I've been going through withdrawals from you
I've been going through withdrawals from you
I've been going through
