

Do You Ever Think of Me

Westlife

You still hold you in my arms
Told you that my heart was yours to keep
We were full of promises
As good as good can get
It felt so real

You said you love me to death
But then you left me in pieces
It just don't make sense the way we fell apart
You said we'd make it through hell
But then you left with no reason
It just don't make sense
It just don't make sense

Do you ever think of me
Every time you waking up alone
Do you ever wish that we
Could go back and never let us go

Left me feeling so heartless
You're the best that I lost yeah
I've been losing my sleep
You're holding on my dreams
So with you ever think of me
You still got my number on your phone

I used to stare at every night
Leave a busy life you talked about
You should know that I still care
I see you everywhere
Where are you now

You said you love me to death
But then you left me in pieces
It just don't make sense, it just don't make sense

Do you ever think of me
Every time you waking up alone
Do you ever wish that we
Could go back and never let us go

Left me feeling so heartless
You're the best that I lost yeah
I've been losing my sleep
You're holding on my dreams
So with you ever think of me
You still got my number on your phone

You said you love me to death
But then you left me in pieces
It just don't make sense the way we fell apart
You said we'd make it through hell
But then you left with no reason
It just don't make sense
It just don't make sense

Do you ever think of me

Every time you waking up alone
Do you ever wish that we
Could go back and never let us go

Left me feeling so heartless
You're the best that I lost yeah
I've been losing my sleep
You're holding on my dreams
So with you ever think of me
You still got my number on your phone
