

## Canyon

Wet

I asked you to show me love and you showed me to a canyon  
I asked for help from up above, almost missed my landing  
Let's leave well and well enough 'cause beggars can't be asking  
And I have never seen a canyon but, oh, I can imagine

Oh, and it's coming for me, I hear him ride around the bend  
Over the hill, looking out through the trees, it was all that I  
imagined

Oh, and what's the matter with me? This time I might've really  
done it

But the world keeps spinning and the sun goes down  
And life keeps living and once again I come around

I have never seen a canyon but, oh, I can imagine  
Those big sand valleys, they've always been here with me  
Now I'm falling down there, used to be more friendly  
And I filled up about a quarter a tank and I said "Get me to the  
bottom"

Oh, and it came in a dream, it was always that I'd imagined  
Over the hill, looking out through the trees, and I've been riding  
round a wagon

Oh, and what's the matter with me? This time I might've really  
done it

But the world keeps spinning and the sun goes down  
And life keeps living and once again I come around
