

## Close Range

Wet

Take me apart slowly  
The more we try the less we know  
The farther I still have to go  
I saw the sign from the morning light  
So low and bright  
Seeing demons seeing demons  
I circle back  
I say a little prayer

Take me apart slowly  
The more we try the less we know  
The farther I still have to go  
I saw the sign from the morning light  
I saw something something in your eye  
So honest that you could never lie  
So on it forgotten  
What's done is done and dust is dust  
On and on and on

Slowly losing what was honest  
There was nothing more I wanted  
I wanted I wanted  
I wanted something that you couldn't understand  
Something honest you weren't always on it  
I wanted something that you couldn't understand  
Something honest you weren't always on it

I was yearning and burning but relief comes in the morning  
Burning and yearning but relief comes every morning  
So long so long  
I know the love will never die  
I know the love we almost shared  
It grows beyond beyond compare  
So it's all enough  
It's all enough

Another one done  
Hold you back  
It goes so fast  
I told you that  
I know I know I know  
And it's too hard to change  
But I keep you close range always  
And it's too hard to change  
Always
