What So Not

Really wanna make you mine, I know
Feel you in my soul, can't take shit slow
Really got high, then felt so low
It's lonely at the top without you

You're with me, I lost my way
Highs and lows put me in my own say
I lost day, I lost my place
Hard to describe when you're in your own way

I dunno where I'm meant to be
But I know that you as dark as me
We both need drugs to go to sleep
We both wake up and can barely see
I know that you gonna bounce, like peace
I know the truth be hard to reach
I dunno why you want me to bleed
I know that I just want you to see

That the life we live could be so precious
Take no effort
I could take your stress and your pressure
I could take your bad days and make them better
Write you love notes now and I meant every letter
Never severe since I met her
And never could I get better
On my heart she pulled some levers forever, I'm gonna get her
And it's all on my mind, oh, I know
I been looking for a sign of how to grow

Really wanna make you mine, I know
Feel you in my soul, can't take shit slow
Really got high, then felt so low
It's lonely at the top without you

You're with me, I lost my way
Highs and lows put me in my own say
I lost days, I lost my place
Hard to describe when you're in your own way

Move out of my
So good, get out of my
So good, move out of my way

Really wanna make you mine, I know
Feel you in my soul, can't take shit slow
Really got high, then felt so low
It's lonely at the top without you

You're with me, I lost my way
Highs and lows put me in my own say
I lost days, I lost my place
Hard to describe when you're in your own way

Move out of my
So good, get out of my
So good, move out of my way
