

In The Summer

Whethan

In the summer, in the summer
In the summer, in the summer

In the summer of 25
We'll be the first to feel alive
I shoot myself around the sun
A hundred light years, just for fun

In the summer of 25
You live so long that you never die
Riding comets just to get the high
In the summer, in the summer

In the summer, in the summer
In the summer, in the summer
In the summer, in the summer
In the summer, in the summer

In the summer, in the summer
In the summer, in the summer

In the summer, in the summer
In the summer, in the summer

Blast me off into the sky
Ball of smoke behind the ride
Got my love sat down beside
Follow me into the light

In the summer of 25
You live so long that you never die
Riding comets just to get the high
In the summer, in the summer

In the summer, in the summer
In the summer, in the summer
In the summer, in the summer
In the summer, in the summer

In the summer, in the summer
In the summer, in the summer

In the summer, in the summer

In the summer, in the summer

In the summer, in the summer
In the summer, in the summer
In the summer, in the summer
In the summer, in the summer
