

# Together

Whethan

I, I'm just a young man  
And I hope it's alright that I walk in my life with no plans  
I gotta go, I gotta go do something  
I'm always running, after the sun

There's no love like love in the summer  
There's no stars like stars you're sleeping under  
There's no nights like nights you don't remember  
There's no fun like drugs we do together

There's no fun like drugs we do together

There's no fun like drugs we do together  
Breathe it in, breathe it out let me feel your lungs  
Breathe it in, breathe it out till you get in a huff

There's no love like love in the summer  
There's no stars like stars you're sleeping under  
There's no nights like nights you don't remember  
There's no fun like drugs we do together

There's no fun like drugs we do together

There's no fun like drugs we do together

(We are together)  
(We are together)

There's no love like love in the summer  
There's no stars like stars you're sleeping under  
There's no nights like nights you don't remember  
There's no fun like drugs we do together

There's no fun like drugs we do together

There's no fun like drugs we do together
