

Astronaut Blues

Whipping Boy

I took a trip on a blue star ship without you
I looked through and through Martian skies to find you
Starry-eyed you went by
You make me, don't take me
Planet sweep, angels weep
Don't wake me, don't take me
Down down down down
Down down down down
Down

Three kisses deep in velvet sleep of nothing
We hit the moon in the cool blue light of something
Starry-eyed you went by
You'll make me don't take me
Planet sweep angels weep
Don't take me, don't make me
Down down down down
Down down down down
Down

Starry-eyed you went by
You'll make me don't take me
Planet sweep, angels weep
Don't make me, don't take me
Down down down down
Down down down down
Down
