

Around

Whirr

I want you around
I want you around
I want you around
I want you around

When we make noise anguish flees
Like a breeze spread out thick
While everyone's spinning I'm stuck thinking about
Wishing these moments would
Last forever and always somehow
'Cause we get on, our whirl is waiting
So we should be around each other now

I want you around
I want you around
I want you around
I want you around

When we seduce the night life
We'll be at peace side by side
While everyone's sleeping I'm up thinking how
The way we are spinning feels like
Time is slowing down
Yeah, we get on, our whirl is waiting
So we should be around each other now

I want you around
I want you around
I want you around
I want you around
