

Enjoy Everything

Whirr

I'll be late
Because of you
Make tomorrow wait
Got things to do
Concentrate
Feeling removed
Increasing bitter taste
Lingering too

You steal all my time
Keep me inside out
How we usually meet
Let you in my life
Running in my mind
On empty

Contagious mood
I know it's strange
I like it when it rains
Pouring on you
And almost every sway
How I'm lovefooled
Remember if there's pain
It's just a bruise

You steal all my time
Keep me inside out
How we usually meet
Now we're sharing sounds
Why I can't fall asleep
So we'll go around
Never want you to leave
Running in my mind
On empty

It feels like somethings missing
When I don't hear from you
So I always try to mention
Everything I do
I'm feeling all this tension
Rewiring my brain
Sending back and forth messages
Try to get through

And I always think about you
You're always in my way
But I never try to stop you
Cause I love what you say
And I know I shouldn't listen
Even though you could be true
When the realest thing about me is I'm pretending too

And I always dream about you
You're always in my waves
How you make me enjoy everything
Even if it's blue
