

Fine Slime

White Denim

You work all night until your girlfriend calls, you say you just can't find time
Gotta interrupt, start serving mush, oh but you call it fine slime
Do what you have to do, somebody gets mad at you but you survive
Then you rearrange and stay in danger, everybody says bye bye

Look out
The water's cold

Oh you can't stand it but your life demands that you adhere are guidelines
You catch a bus, but stay curious, oh flip on a night line
[?] police, saying you watch the street band then quench your appetite
Do what you have to do, nobody gets mad at you if your alibi is airtight, airtight

Look out
The water's cold
The water's cold

When you want it, you can get it, when you get it, you put it down
(You got what you wanted adjust the ceiling come down)
When will you open your eyes, and see the rain going around
(Is this what you wanted and this connection goes out)

Soul bleeding, your disease seeding
You've already got it, and carry it and fall down
And your dream brings that feeling
You got what you wanted but you don't wanna come down

Sold me right down
(You got what you wanted and yet you got to come round)

You walk and talk, adjust the clock and change the locks to make your dime shine
You run uphill, and sign the deals, tell me how that feels to strut the fine line
Try on new attitudes by [?] tools and take some me time
Then you rearrange and stay in danger, everybody says bye bye

But look out
The water's cold
The water's cold
