

Let's Switch It Up

White Denim

There's a feeling down in my feet
Felt so good I nearly hit the street
Can't get enough of it and I'm so pleased
What you got is what I need

Started tingling in my fingertips
Can't let it go to really get a grip
Hold it so tight and then I let it slip
Never knew it could feel like this

(Always) I came to party and have a good time
(Can't wait) to get together won't you show me a sign
(Always) Switch it up, let's have a good time
(Can't wait) to show you something that will blow your mind

Look around, what do you see?
Another golden opportunity
I'm over your R-E-S-P-E-C-T
What you got is what I need

Time's racing, clock is running fast
Get on the floor, move it fast
I'm on the level there's no need to ask
Take off your shoes if you wanna dance

(Always) I came to party and have a good time
(Can't wait) to get together, won't you show me a sign
(Always) Switch it up, let's have a good time
(Can't wait) to show you something that will blow your mind

(Always)
(Can't wait)
...

See through you, see through me
An everlasting continuity
What you got is what I need
What you got is what I need

I came to party and have a good time
Can't wait to get together won't you show me a sign
Let's switch it up, let's have a good time
Can't wait to show you something that will blow your mind
