

## New Coat

White Denim

When we met we reminded  
One another of an time we'd never lived in  
Forgiving ourselves for being persons  
That we'd maybe never been and we won't become again  
What was the thoughts that I howl and echo that we shift and we  
shape each time that it's remembered

With my eyelids glued to the roof  
I feel much better when there's little to prove  
And this certainty until you're hurting me  
You say it ain't always sunny but you got a new coat  
And every song you sing I'm learning note for note  
And I'm certainly right where I wanna be

I say hey hey darling that's what I needed to hear  
You know it works much better and there's little to fear  
And I hope it's true I'll always be with you  
'Cause I'm certainly right where I wanna be

When all we learned from our mistakes is all we learn  
We could get it some way about it maybe  
If we always like advice we could let it be good to forget it  
Till it ain't good to forget it

With my eyelids glued to the roof  
I feel much better when there's little to prove  
And this certainty until you're hurting me  
You say it ain't always sunny but you got a new coat  
And every song you sing I'm learning note for note  
And I hope it's true I'll always be with you  
I say hey hey darling that's what I needed to hear  
You know it works much better and there's little to fear  
And I hope it's true I'll always be with you  
'Cause I'm certainly right where I wanna be  
And I hope it's true I'll always be with you  
'Cause I'm certainly right where I wanna be
