

Change The Way

White Heart

Change the way, change the way
Change the way you feel about love

You can hardly stand
The thing called love
You just can't believe this is everything you've been
dreaming of
You say "Sell my brain, break my heart
Finally had enough, goodbye love - I'm getting out"

It's girlfriend, boyfriend - up and down
Around the bend
Knockdown, get up and do it again

Change the way, change the way
Change the way you feel about
Change the way, change the way
Change the way you're feeling
There's a way, there's a way
To change the way you feel about love

Picture this, a love that lasts
You got a premonition you're in a condition that's
second best
So here's the truth - there's something more
If you wanna end this pain, love's got a name
You can call Him Lord

Tender, deeper - love like an open door
A new world's waiting, but you've gotta call Him Lord

Change the way, change the way
Change the way you feel about
Change the way, change the way
Change the way you're feeling

There's a way, there's a way
To change the way you're feeling
'Cause love is kind, never blind
Nothing ordinary 'bout His love
Girlfriend, boyfriend - He'll make everything new again

(Repeat chorus)
