

# The Observers

White Skull

We are here not sent by God  
To check mother earth  
1000 light years from home  
There's some work to do  
Save the humans from destruction  
You are near the end

If you fly high, you will see  
You've done damage  
And we are here to repair

[Chorus:]  
Fly, fly to see your earth from heights  
You have to think of a better life  
You have to work and work to have a better world

You are far away to pacify the world  
Fight, war, everywhere  
You want to use nuclear bombs  
they will get you to the end
